

RefAware

Infinite Knowledge Starts Here.

RefAware – a web-based current awareness service designed to provide researchers and other members of the academic community with immediate access to new research and publications in their field --- all within hours of being posted online. Providing one source for a variety of research data, RefAware constantly scours the internet for the latest information and automatically delivers newly found data. By harnessing the speed and accessibility of the internet, RefAware provides a comprehensive, up-to-the minute picture of today's global research.

Overview

- Providing coverage from over 8,000 peer-reviewed journals and other non-refereed sources of information.
- Discipline-specific coverage includes Life Sciences, Biology, and Medicine; Physical Sciences; Engineering; Social Sciences; Arts & Humanities; and Business.
- Leading scholarly journals with high impact factors within specific disciplines are scanned for inclusion.
- Search through tens of thousands of online source material.
- Create notification system to automatically receive new updates and information through email alerts.
- Ability to export references seamlessly into a variety of bibliographic management software programs.

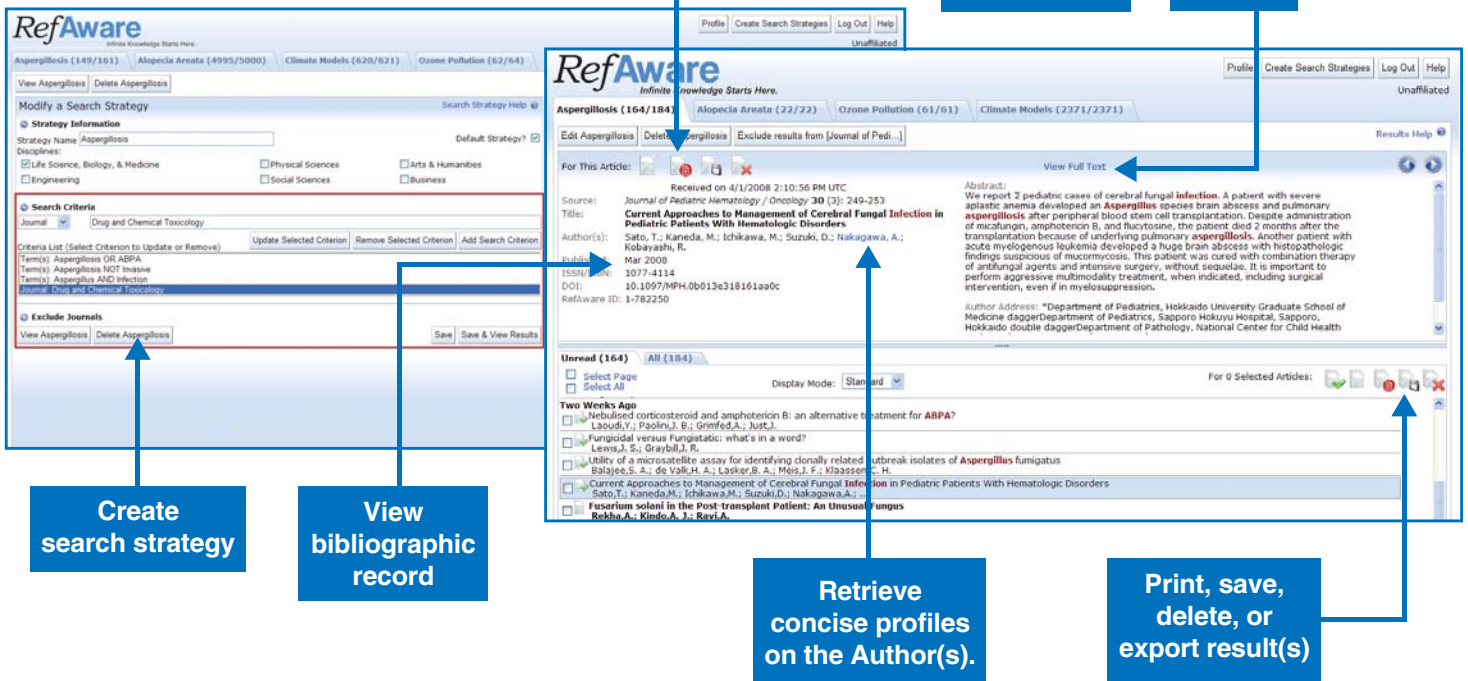

Benefits

- Constantly crawls the Web searching for newly available references and information.
- Saves time by providing one source for a variety of research data.
- Top journals with high impact factors within specific disciplines are scanned for inclusion.
- Results include images as well as bibliographic information, if available from Source.
- Extend your network and obtain concise information about the Author(s) of the publication in your results, with COS Scholar Universe.
- Receive immediate notification of new references through email alerts.

Features

- Allows creation of distinct search strategies which consist of key terms, authors, and journals of interest, including the ability to create a Custom Source Set for inclusion in your strategy
- Uses an advanced proprietary web-scraping technology that constantly scours the internet for new information.
- Retrieve concise profiles on the Author(s) with links to COS Scholar Universe.
- Incorporates the retrieval of images as well as bibliographic information.
- Enables users to set up email alerts when new references or information are available.
- Seamless links to full-text article.
- Automatically export new references of interest into your personal database.

How RefAware Works

- Based on the “search strategies” designed by the user, RefAware constantly scours the internet searching for new and/or currently available information.
- A link of any new references found based on the area of interest are delivered to the user’s email address, sometimes multiple times throughout each day.
- Once alerted to new information, users can export the new references into a variety of bibliographic management software programs. (RefAware users that have a RefWorks account can create automatic links between the services.)

Who Needs RefAware?

- **Researchers:** Keep abreast of ongoing research and remain current in all published works.
- **Graduate Students:** Remain current on the latest hot topics within a field. Provides automatic references and source information for thesis papers.
- **Undergraduate Students:** Compile references for term papers or research projects.

“RefAware found a very recent paper for us that may prove to be critical in shaping a new direction for a research initiative we have started in the lab. Because this area is new for us, we were not extremely familiar with the relevant literature, and RefAware has been very helpful in getting us up to speed quickly.”

Randolph D. Glickman, Ph.D.

Senderoff Professor of Vision Research Department of Ophthalmology
University of Texas Health Science Center at San Antonio
